BRUSH BOTTOM DOOR STRIP WITH PVC COVER CLIP FITTING INSTRUCTIONS

- 1. Measure bottom of door width.
- 2. Slide the brush out of the housing and cut the housing to size.
- 3. Using a pair of pliers cut brush to the same size ensuring the metal brush housing is crimped. This is to prevent the brushes falling out.
- 4. To prevent the brush insert coming out of the housing either crimp or glue at each end of the housing.
- 5. Screw firmly to base of door.
- 6. Adjust if necessary for perfect fit.
- 7. Hold the Clip Cover up to the door, mark it off to the same length as the metal housing and cut to size.
- 8. With the rubberised foot to the top, attach the Clip Cover to the brush housing as shown below. Pushing it firmly into position all along its length.
