THE SIMPLE WAY FOR PLUMBING IN WASHING MACHINES, DISHWASHERS ETC.

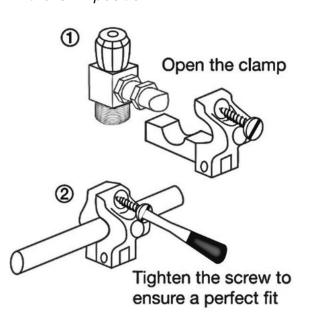

Suitable for use on 15mm Copper Pipe.

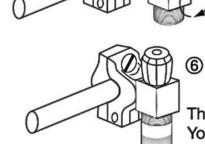

For use on hot and cold water.

Fitting instructions:

Tools required: screwdriver and spanner.

Before installing Self Cutting Tap, ensure the valve is in the OFF position.

Screw the tap thread clockwise into the clamp by hand. Do not use a spanner or any other tool

Close the clamp

over the copper pipe

The tap is now ready for use. You can attach your washing machine hose supply (420183/4)

Use a spanner on the hexagonal nut to allow adjustment of the tap into a suitable position

Product design may vary.

If in doubt, contact a qualified plumber.
