## Tools required (Tools not supplied)

## Parts Supplied

NO.	Description	Qty
1	Tap Body	1
2	Washer	1
3	Anti-Rotational Washer	2
4	Backnuts	2
5	Wall Bracket	1
6	Shower Hose	1
7	Handset	1

## Specifications

The taps is suitable for use at water supply pressures of 0.2 bar (min.) to 5 bar (max.).

This pressure rating is determined by the manufacturer using soft water under test house conditions and may differ to the retailer's recommendation.

BS 8558 recommends hot water should be stored and distributed at a temperature of not less than 60°C which will help minimise the build-up of limescale. For further details contact your Local Water Authority.

This taps should be installed in compliance with the Water Regulations.

- (a) Identify all components and check pack contents.
- (b) Turn off water mains supply.

# Installation

1. Fit Tap Body (1) to bath, ensuring that the Washer (2) is fitted between the Tap Body (1) and the bath.
2. Fit Anti-Rotational Washer (3) over inlet legs. Then fit Backnuts (4) to the inlet legs and tighten. **DO NOT OVERTIGHTEN.**
3. Connect to the water supply using suitable plumbing joints.
4. Fix Shower Hose (6) to Tap Body (1) using the Rubber Washer supplied with the shower hose. Rubber Washer to be fitted between the Shower Hose (6) and the Tap Body (1). **DO NOT OVER TIGHTEN.**
5. Fix Wall Bracket (5) to the wall at the required height ensuring the Handset (7) will fit correctly into the Wall Bracket (5).
6. Turn on the hot and cold and mains water supply. Check for leaks immediately. It is always advisable at this stage to flush out the system. To do this, open both valves fully and allow water to flow for approx.1 minute. This will remove any foreign matter within the installation.
7. Finally turn on all the water heating arrangements.
8. Assemble Shower Hose (6) to Handset (7) using Rubber Washer supplied with Shower Hose (6). **DO NOT OVERTIGHTEN.**

# Aftercare

Whilst modern plating techniques are used in the manufacture of these fittings, the plating will wear if not cleaned properly. The safest way to clean your product is to wipe with a soft damp cloth. Stains can be removed using washing up liquid. All cleaning powders and liquids will damage the surface of your fitting even the non-scratch cleaners.
