SLIDING MITRE SAW

TE-SM 254 Dual

- The saw has clever quick-adjust facilities for the angle of the table and head. The adjustment levers are conveniently located at the front of the machine.

- The saw head can be precisely adjusted up to 45° on the left and right side for miter cuts. In addition, the laser is an enormous help for positioning the workpiece correctly.

- A rubber clip behind the saw blade helps remove the chips more effectively, for keeping both the air and the workplace clean.

Important information at a glance
