

ADD STEAM FOR CRISPIER BAKING

In addition to all your standard oven functions, the PlusSteam function in this SteamBake oven adds steam at the beginning of the baking process. The steam cooking keeps the dough moist on the surface to create a golden colour and tasty crust, while the heart stays soft and tender.

Product Benefits & Features

SteamBake - for perfect baking results

You take pride in baking bread, pies and cake and want them to not only taste great but also look amazing. By using SteamBake your bake goods get a touch of steam for a glossier colour and crispier crust.

Perfect results with the Food Sensor

Thanks to the Food Sensor of this oven you can measure the core temperature from the center of your dish during the cooking process. So you get the perfect results everytime.

A self-cleaning oven

With one touch of the Pyrolytic cleaning function, dirt, grease and food residue in the oven is converted into ash that you can easily wipe off with a damp cloth.

Effortless control. EXPLore LED Display with Touch buttons

Explore a new way to experience your oven with the responsive EXPLore LED Display with touch buttons. The vibrant interface gives you quick access and dynamic control of cooking time, temperature, and other features.

Cooked Evenly everywhere

With this oven, using energy efficiently also means cooking efficiently. It has a new convection system called Hot Air, which ensures hot air circulates evenly throughout the oven cavity. The result is that the oven heats up faster and cooking temperatures can be reduced by up to 20%, saving you both time and energy
