

BSW
Timber

The UC4 Collection

15 YEAR
WARRANTY

Posts, sleepers and joists with a 15-year warranty

Continued investment in cutting-edge technology enables us to offer an innovative range of incised, Use Class 4 products.

Our game-changing incising process creates small, structurally sound slits in the timber, ensuring that our chemical treatment can impregnate 6mm further into the timber, delivering a guaranteed minimum 15-year life span.

- Range of quality incised products
- Protected by BSW's 15-year UC4 guarantee
- Specially developed for Use Class 4 applications
- Manufactured from homegrown spruce
- Green or brown treated options available
- Easy application of paint or stain

What is UC4?

Use Class 4, or UC4, is a class within BS EN 335-2 that determines where timber products are and aren't suitable for use.

If a timber product meets UC4, that means that it is suitable to be used in ground contact or freshwater.

What is Incising?

When a piece of timber has been incised, this means that a bladed machine has made tiny incisions along the surface of the timber.

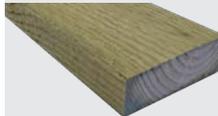

Incising allows preservative treatment to penetrate further into the timber, increasing its life span without affecting its strength.

Incised Sleepers

100x200	125x250	100x150
1800	1800	1200
2400	2400	1800
