

# RMG005DG

The RMG005DG is a partial privacy aluminium double swing driveway gate with a vertical solid infill design and bell-curved top providing a traditional, unique style with a contemporary twist while allowing more visibility on the top section of the gate.

Although aluminium is very strong, it is also lightweight which makes it a versatile material. This is perfect for the fabrication of gates compared to traditional metals such as; wrought iron, cast iron, wood or stainless steel.

Another advantage of the RMG005DG is that it is very low maintenance. Aluminium is highly resistant to corrosion unlike other metals, it will not suffer from changing weather conditions and actually becomes stronger in low temperatures, perfect for UK buyers!

In order to keep the gate looking brand new, simply wash down with soapy water and rinse. There is no special treatment required and the gates also have a 5 year manufacturer's guarantee.

- ✓ Various sizes available.
- ✓ Custom colours available.
- ✓ Powder coated finish.
- ✓ Modern and stylish.
- ✓ Robust and lightweight.
- ✓ Very low maintenance.
- ✓ Wall or floor mounted optional fixings.
- ✓ Driveway gates can be manual or electrically automated.
- ✓ Easy installation.
