of the work  
done!**

## INSTALLATION IN FEW AND EASY STEPS

1

Laying in staggered rows avoids the superposition of 4 sheet thicknesses at overlap points. Always start your first row at the gutter, leaving maximum 7 cm overhang. Begin the second row with half an ONDULINE EASYLINE® sheet (cut lengthwise) and carry on with complete sheets.

2

Sheets must be fixed onto each of their supporting battens. Every corrugation should be nailed at eaves, overlaps and ridges. Every second corrugation has to be fixed at the intermediate purlins. The fixing at the intermediate purlins has to be staggered.

3

Use a ridge batten to support the Onduline ridge piece as shown. The ridge element has to overlap the ONDULINE® sheet min. 12 cm.

The ridge elements are fixed in opposite direction to the prevailing winds.

## 4 Roof support

Battens rules. The roof pitch and occasional load (especially wind and snow) determine the distance between the battens.

The maximum distance is in any case 43 cm.

### Roof pitches

> 5° - 10°

>10°

### Maximum battens distance

Boarding only (Recommended)

43 cm

### Minimum end overlap

30 cm

15 cm

### Minimum side overlap

2 corrugations

1 corrugation

### Effective sheet coverage

0,47 m<sup>2</sup>

0,57 m<sup>2</sup>

### How to cut and trim your product?

You can easily cut the sheets with roofers cutter, or with hand or mechanical saw.
