Smart Motion CCTV

The Yale Smart Motion CCTV gives you peace of mind that your home is securely protected, allowing you to check from anywhere via a smartphone, using the Yale View app.

The Smart Motion Detection feature focuses in on human shapes, whilst the Dual Tech technology corroborates movement to limit the number of false alarms and the bright white lights act as a deterrent to any potential intruders.

Smart Motion Detection
Recognises human & vehicle shapes

Dual Detection Technology
Limits number of false alarms by identifying movement of humans or vehicles.

AI Coding
Focuses on specific human & vehicle data to save storage.

- Smart Motion Detection (SMD) focusses on real threats - recognising human & vehicle shapes on motion detection, rather than simply heat & motion – significantly reducing false alarms

- Focused smart search enables users to search for specific human or vehicular data – reducing laborious search times

- Now with an extended night vision of 30m the SMD CCTV Kit enables users to more readily identify intruders due to the night colour vision of 10m

- Dual Detection Technology uses both PIR & Video Motion to work together to correctly identify movement of humans or vehicles to limit number of false alarms

- Full channel AI coding focuses on specific human & vehicular data to save circa 50% on storage & bandwidth and maintain image quality

- When the PIR detects movement, the Active Deterrent feature initiates - white warning lights can be set to flash or remain constant, when potential intruders are near

- Image masking – eliminate areas that are not of interest, to focus on those that matter most for the security of home

- Integrations with Google Assistant for voice control

- Additional wired cameras be added as well as Wi-Fi cameras to complete your home security

Trusted every day

Specifications

Product Specifications	Yale Smart Motion CCTV Kit **YSV-2CSMD-4CK**	Yale Smart Motion CCTV Kit **YSV-4CSMD-8CK**	Yale Smart Motion CCTV Camera Extension **YSV-1CSMD**
Resolution	Full HD 1080p	Full HD 1080p	Full HD 1080p
