

### Ultion 3\* Plus

The Ultion cylinder is one of the most secure on the market - so much so in fact that no test has beaten it. The cylinder has passed all major British standards test for security without the need for cylinder protectors or extra secure door handles. These tests include the highest TS007 standard (3 star) and the extended Sold Secure Diamond test, which is more rigorous and designed by the Master Locksmith Association.

Now with Double Lockdown mode

Double Lockdown mode offers even more snap protection. Ultion's trademark Lockdown Mode just got stronger, Ultion WXM houses two hardened SS630 attack pins that fire when an attack is detected.

The Ultion Lockdown Mode detects forced entry and activates an attack lock directly into the central cam. Even if the most determined intruder gets past Ultion's two sacrificial sections he won't get to the attack lock because it is protected deep inside a solid molybdenum core and secured with a dedicated retaining pin.

Even after an Ultion cylinder has thwarted an intruder's attempt, the door can still operate the lock normally from inside - leaving then homeowner in complete control of their security

Double Lockdown mode. More snap protection.

Ultion's trademark Lockdown mode just got stronger. Ultion WXM houses two hardened SS630 attack pins that fire when an attack is detected.

Extra Molybdenum.

The unique WXM two-part plug design replaces brass with molybdenum, making it harder to attack with a drill and stronger for longer.

More pick protection. 33% thicker key.

The 33% thicker key material brings 33% more pin heights and more picking protection for your customers.

Tapped pins.

Two tapped pins are randomly placed to ramp up the skills, tools and time required to pick.

Protected key profile.

The trademarked WXM key profile makes it harder for counterfeit keys to jam the lock.

3x more cycles than other 3\* locks.

Most 3\* locks need to operate after 100,000 cycles. The extra molybdenum in Ultion WXM keeps it strong for up to 300,000.

The only tool to open an Ultion locked Door-Stop door

The Ultion cylinder is one of the most secure on the market - so much so in fact that no test has beaten it. The cylinder has passed all major British standards test for security without the need for cylinder protectors or extra secure door handles. These tests include the highest TS007 standard (3 star) and the extended Sold Secure Diamond test, which is more rigorous and designed by the Master Locksmith Association.
