

### YELLOW HI-VIS WALKWAY MATTING

Product Code	Pricing Unit	Colour	Size	Pack Quantity	Pallet Quantity
PRCHY2	Each	Yellow	1m x 10m x 3mm	1	25

#### Product Description:

Yellow Hi-Viz Walkway Matting is a high-quality, general-purpose rubber matting with a diamond pattern design on one side and a cloth impression pattern on the reverse. The excellent non-slip properties make it perfectly suited for walkways, tread mats, runners, and other general-purpose industrial applications where this property is of paramount importance.

PVC rubber has anti-tear and excellent anti-fatigue properties and fantastic durability, resulting in a longer life for the material. PVC flooring also has natural sound deadening properties, making it the perfect choice for high traffic areas such as walkways.

This matting comes in a thickness of 3mm, as opposed to the standard 2mm that other Hi-Viz matting comes in. This added thickness is key to the flexibility of the mat while maintaining its light weight and easy to use nature.

#### Benefits:

- Superior non-slip properties, even when wet.
- Anti-tear and anti-fatigue properties.
- Excellent durability.
- Does not go brittle in low temperatures.
- Diamond Pattern Rubber: 70° Shore.

#### Limitations:

- Non fire retardant.

#### Application:

Simple lay the roll on the floor and kick out in front of you. Use a straight edge and a knife to cut when necessary.

#### Performance Data:

Colour	Yellow
Compound:	SBR/NR
Hardness [shore A]	70°
Density[SG]	1.5
Tensile Strength	30 Kg/cm2
Elongation[min]	200%
Abrasion Resistance	250 mm3
Minimum Temperature	-30°C
Maximum Temperature	+70°C
