

HI-VIS SCAFFOLD TUBE PROTECTOR

Product Code	Pricing Unit	Colour	Dimensions	Thickness	Pack Quantity	Pallet Quantity
PEFOSP	Each	Yellow	50mm x 2m	14mm	35	175

Product Description:

Proguard High-Visibility Scaffold Protector tubes have been specially designed to wrap around scaffold poles to provide impact protection and hazard awareness for pedestrians and the employees on the site. Most often the foam scaffold protection tubes are found fitted on the ground level poles but they can be used at any level.

Proguard yellow scaffolding protection tubes are made from high-density foam to provide excellent impact protection. They are pre-slit to easily slip around the scaffold tubes and they should be secured with cable ties.

Proguard hi-vis scaffold tube protectors are also known as hi visibility protection foam sleeve, health & safety foam sleeves, scaffold tube protection sleeve, scaffold sleeves and also hazard protection foam.

Benefits:

- Hi-vis to alert pedestrians and employees to take care.
- Scaffold protector tubes are recommended to be used by Health & Safety authorities.
- Durable and reusable.
- Can be cut to size.
- Pre-slit for easy application.

Limitations:

- Non-fire retardant.
- Must be secured with cable ties.

Application:

The scaffold pole protectors come pre-slit for easy application. Simply pull the tube open and clip directly onto the scaffold pole/tube. Secure with our *Proguard Cable Ties*.
