

DEBRIS NETTING

Product Code	Pricing Unit	Colour	Dimensions	Thickness	Pack Quantity	Pallet Quantity
PSNDG1	Each	Green	2m x 50m	70gsm	1	30
PSDN1	Each	Blue	2m x 50m	70gsm	1	30
PSNDO1	Each	Orange	2m x 50m	70gsm	1	30

Product Description:

Proguard debris containment netting is manufactured from a knitted fabric which has an open mesh construction to reduce wind loading on scaffold structures. Debris Netting is designed to be fixed to the outside of the scaffolding framework for the protection of personnel, buildings and traffic. It is secured by using cable ties, achieving a fixing pattern of approximately one cable tie per metre in each direction.

Proguard debris netting is manufactured from heavy duty 70gsm material, ideal for improving the safety of employees and pedestrians around the perimeter of the construction site.

Proguard debris netting is available in a green, blue and orange.

Benefits:

- Open mesh netting to reduce wind loading on scaffolding structures,
- Eyeleted for easy installation with cable ties.
- Available in Green, Blue and Orange.
- Proguard debris netting is very versatile – can be used on scaffolding or heras fencing.
- Reduces risk of debris falling outside of the working area.
- Recommended for scaffold protection by Health and Safety Authorities.

Limitations:

- Non-fire retardant. Use our *Proguard Fire Retardant Debris Netting* when this is a requirement.
- Must be secured with cable ties.

Application:

Unroll the debris netting and cover the scaffold sheeting or heras fencing. Secure with our *Proguard Cable Ties*.

Performance Data:

Thickness 80gsm
