Product Description:

Proguard Bubble Wrap is commonly used as a packaging material for wrapping and protecting goods during transit. It is also popular in the building and construction industry for surface protection.

Bubble wrap is manufactured from flexible polythene containing numerous small air pockets which provide excellent protection for goods on site or in transit. Proguard Bubble wrap is perfect for protecting awkward items such as ceiling lights, chandeliers and door handles. It is also well suited for protection of glass products, windows and curtain-walling.

Benefits:

- Lightweight, waterproof and flexible.
- Provides excellent impact, compression and scratch protection.
- Ideal for protection for awkward items such as ceiling lights, sanitary ware and bath taps.
- Multiple uses for wrapping, surface protection and insulation.

Limitations:

- Non-fire retardant.
- Requires fixing to ensure that the bubble wrap stays in place.

Application:

Wrap the item or cover the surface to be protected. Use *Proguard Low Tack PVC Tape* to secure the bubble wrap in place. When fixing this product to glass, aluminium and other sensitive surfaces we recommend you use *Proguard Ultra Low Tack Tape*.
