

ENGLISH

INSTALLATION

Install on a flat, stable surface with a 1–2% slope to allow water drainage.

Do not install on grass, loose soil, gravel, or uneven stone surfaces.

Leave at least 10mm gap near walls or columns to allow for wood expansion.

Avoid installation during rain or on wet/damp surfaces.

MAINTENANCE

Clean regularly using a soft cloth and mild soap. Avoid high-pressure washers or harsh chemicals.

Do not use steel wool or metal brushes as they may damage the wood surface.

Re-apply water-based oil every 6 months, or more frequently in extreme conditions.

Re-oil when water is no longer beading, the surface looks faded, or feels dry.

SEASONAL CARE

In rainy or snowy conditions, clean and dry the product before covering with a breathable tarp or storing indoors.

In hot climates, provide shade where possible and lightly water surrounding area to prevent excessive heat.

Perform maintenance checks at the start of each season.

WARNING

Failure to follow installation and maintenance guidelines may reduce product durability and void warranty.
