

NOPE!® CP Flea Killer

Product Description

NOPE!® CP Flea Killer is formulated to kill fleas quickly, leaving long-lasting residue to provide ongoing protection. It is designed for direct application to carpets, floors, curtains, soft furnishings and other areas of activity.

NOPE!® CP Flea Killer is not to be used on human bedding, pet bedding, pet sleeping quarters, or where pets frequently lie – instead these areas should be thoroughly washed with hot water.

NOPE!® CP Flea Killer should not be applied to pet's fur or skin. Veterinary approved flea treatments should be used for this purpose.

Benefits

- Kills fleas
- Solvent-free
- HSE registered
- Fast acting
- Long lasting

Properties

Coverage	100 to 200 m ² per 5 litre pack. 10 to 20 m ² per 500 ml pack. Apply 25 to 50 ml of product per m ² of surface
Storage	Store in a cool, dry place, protect from frost. Keep the container tightly closed.
HSE No.	10815
Active Ingredient(s)	Cypermethrin 0.1%, Benzalkonium Chloride 0.1%
Shelf Life	24 months

Application Information

Preparation (Floors, Carpets, and Soft Furnishings)

Apply a small amount of **NOPE!® CP Flea Killer** to an inconspicuous test area of each substrate to be treated (e.g. carpet, sofa) before full treatment commences to ensure compatibility with the substrate.

Before treatment, clear as much floor space as you can to ensure that treatment is as thorough as possible.

Vacuum all areas prior to treatment. This has three advantages:

- Helps to remove any debris, eggs, larvae, pupae and adult fleas
- The vibration of the vacuum cleaner stimulates adults to hatch from their cocoon stage. **NOPE!® CP Flea Killer** is most effective against adult fleas.
- Enables **NOPE!® CP Flea Killer** to penetrate down to the base of the carpet fibres where fleas live.

After using your vacuum cleaner always empty the contents into a black plastic bag. This will contain eggs, larvae and adult fleas and it is important to prevent any of these re-infesting the home. Therefore, immediately seal the bag and dispose of it in an outside bin.

Store away exposed foodstuffs and make sure you fully cover and seal any fish tanks.

Remove any pets from the area, only allowing them back when the treated areas have had time to dry and have been fully ventilated. Leave the treatment to dry for a minimum of 3 hours, but preferably overnight, and ensure good ventilation before reintroducing pets.

Application

Read the label before treatment. **NOPE!® CP Flea Killer** should be used on hard and soft furnishing, carpets, floors, curtains, crack and crevices and other areas of activity. Apply the product using the spray bottle provided at a rate of 25 – 50 ml per metre square. A 500 ml pack should cover 10 to 20 m².

Wash hands thoroughly after use. Keep unprotected people and animals away from treated surfaces until they are fully dry.

NOPE!® CP Flea Killer is not to be used on human bedding, pet bedding, pet sleeping quarters, or where pets frequently lie – instead these areas should be thoroughly washed with hot water.

NOPE!® CP Flea Killer should not be applied to pet's fur or skin. Veterinary approved flea treatments should be used for this purpose.

Other Information

For full health and safety information consult the safety datasheet (SDS). This product is approved under the Control of Pesticides Regulations (1986) for use as directed. HSE No. 10815. Use pesticides safely. Always read the label.

Application Flea Treatment Strategy

Treatment of carpets, floors, and soft furnishings with **Nope! CP Flea Killer** forms part of a flea treatment strategy. Other suggested measures include:

- Application of veterinary approved flea products to your pet on a regular basis
- Brush out your pet's fur before going inside after walks, etc.
- Frequent vacuuming of the affected home, paying particular attention to the areas frequented by pets – especially carpeted areas, furniture that is used by pets, pet sleeping areas, etc.
- Regular washing of pet's bedding, blankets and other washable items in the hottest water possible.
