

Underlays TimberTech Elite

11.25.v1

Wood underlays that deliver a new level of noise reduction and comfort.

Suitable for use with laminate, engineered and solid wood flooring (floating floor installation).

■ Ideal for underfloor heating

With a very low tog value of 0.1, TimberTech Elite is the perfect choice if you have underfloor heating, letting it heat the room more efficiently.

■ Shhh! Underlay at work

TimberTech Elite reduces walking noise and impact sound by up to 20dB, cutting down noise level and making the room a more comfortable place to be.

■ Provides strength & stability

The high-density and compressive strength fully support the floor and prevent movement, keeping it in good shape for a longer life.

■ Protects against moisture

A silver vapour barrier gives superior protection against moisture rising from the sub-floor, keeping your floor dry.
