

Proplex Surface Protection Sheets

Description

The corrugated polypropylene sheet is a fluted protection board with a twin-wall construction for a strong, yet lightweight, solution to surface protection. Used in a variety of internal and external applications during building, construction and refurbishment projects, the fluted polypropylene sheets can be cut, curved or creased to fit any surface

Technical Specifications

Material	Polypropylene
Size	1.2m x 2.4m
Thickness	2mm 250gsm 0.72kg
Markings	Protec Logo and details
