## III. Instructions & Note

### -Instructions-

#### STEP 1

Adjust the jaws to the desired width to fit around the object you need to grip.

#### STEPS

#### STEP 2

Place the upper jaw on the workpiece, slide the lower jaw into position, firmly hold the handles, and apply pressure to turn the wrench. Keep on turning it until the nut is tight or loose enough to remove.

**Note: ensure the jaws are securely gripping the object.**
